## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guan (US 6,423,794) and Killian et al. (WO 98/40420) respectively.

Guan teaches a process for ethylene polymerization process in the presence of a complex of formulas (VI)-(VIII), wherein T can be  $-\text{CR}^9\text{CR}^{10}-$ ,  $\text{R}^2$  can be a hydrocarbyl,  $\text{R}^{13}$  is a hydrocarbyl such as aryl or substituted aryl, and  $\text{CR}^{11}$  and  $\text{CR}^{12}$  can be hydrocarbyl or substituted hydrocarbyl (col. 3, line 30 to col. 4, line 64).

Thus, it would have been obvious to a skilled artisan at the time the invention was made to employ Guan's teaching to prepare the ligand of the complex, and then the complex catalyst and prepare ethylene polymer in the presence of such complex catalyst since such is within the scope of Guan's teaching and in the absence of any showing criticality and unexpected results.

Similar rejections are also made over the teaching of Killian et al. (WO 98/40420), see page 10, line 14 to page 12, line 27.
